

We are going to improve the quality of our handwriting through teaching handwriting regularly and using it in all of our learning.

We will continue to use the zones of regulation behaviour language and SCARF values to positively enhance our learning behaviours.

We are going to improve the quality of our writing by further developing purposeful learning journeys.

We want to continue to make sure our teaching and learning is even better by developing the learning environments and working walls so they can help us when working independently.

Our school improvement plan 2024-2025

How we are making Petersgate Infant School even better...

We are going to further our understanding of inclusion and diversity across the curriculum.

We are going to improve the quality of our maths by further developing our problem solving skills to challenge us all.

We will continue to refine and develop the curriculum offer so we can understand about the natural world across lots of different subjects and use this knowledge when learning outside.

We will use this learning to help us understand how we are feeling and share our feelings with others.

We need to ensure we are in school every day, on time and that our attendance continues to improve. We know this impacts positively on our learning.
